To get this data you need to visit Kaggle Notebooks, check the box to confirm that you are not seeking data and then click Browse. Once you've done that, your data will appear. The toolbox you are looking for is called Sketchy. The first time you go to the toolbox, you will be prompted to sign up. If you don't want to sign up for Sketchy, you can also get the data from GitHub instead. If you want to open the notebook with Kaggle then, right-click on it and click "Open notebook in Kaggle". Finally, click on "Run all notebooks". 2. The "Interactions" dataset This dataset is available on Google Cloud, as part of Google Analytics, and on the Google Sheets site. Go to Google Analytics, and create a new view and add the dimension pagePath. Once you've done that, go to the "Interactions" dataset and download the data. For this tutorial we will also use the full stack of data, which can be found here. You will find: a spreadsheet with the complete data, or you can download it here. The source code for the tutorials. The description of the model that we are using. The notebook used to train the model. 3. The "Movies" dataset Go to Google Analytics, and create a new view and add the dimension pagePath. Once you've done that, go to the "Movies" dataset and download the data. 4. The "StopWords" dataset Go to Google Analytics, and create a new view and add the dimension pagePath. Once you've done that, go to the "StopWords" dataset and download the data. 82157476af
