You can also download videos from your favourite movies, music albums, playlists or radio stations. The latest release of YTD Video Downloader is now at version 2.7. This version supports iPhone 5 and iPod Touch 5G and now supports 1080p HD videos for the iPad. This update also has two new features. The first is support for iPhone 5.0 and iPhone 5.1. These updates support all the features of the new OS. The second new feature is a dedicated MP3 playlist. You can now save your favourite music videos for later. External links Official website Category:Software for iOS[A case of thyroid cancer metastasizing to the right atrium]. A 67-year-old woman was admitted to our hospital with the chief complaint of chest pain. The patient had a thyroid tumor and a history of tracheal sleeve resection at 55 years of age. A right atrial tumor was detected by a preoperative transthoracic echocardiogram. Right atrial tumor resection was performed through a right atrial approach using cardiopulmonary bypass. The resected tumor was an atypical follicular carcinoma with a multinodular growth pattern. Immunohistochemical staining revealed that the tumor cells were positive for TTF-1. One month after the operation, the patient died of brain metastasis. Thyroid cancers are known to have a poor prognosis, with a 5-year survival rate of approximately 40%. The prognosis of thyroid cancer that metastasizes to the heart is also poor. We reported a case of thyroid cancer metastasizing to the right atrium.Q: Time complexity of this code I was working on a graph in C++ and I came across a question as to what the time complexity of this code is. I've looked at similar questions but the answers were either way too easy or vague. Can someone please clarify this.

```
int main() { while(number
```
